\*Due to changes in accounting procedures, data for April 1986 and subsequent months are not strictly comparable with those for earlier periods. In particular, unemployment insurance contributions before April 1986 are included in Specified Purpose Accounts.

†Fiscal year totals are from the audited Public Accounts of Canada, while monthly data are from the unaudited "Statement of Financial Operations" published in the Canada Gazette. The sum of the monthly data for a fiscal year is likely to differ from the annual totals taken from the Public Accounts.

\*À cause des modifications apportées aux méthodes comptables, les chiffres d'avril 1986 et des mois suivants ne sont pas tout à fait comparables à ceux des périodes précédentes. Il est à noter que les cotisations versées à l'assurance-chômage avant avril 1986 figurent sous la rubrique des Comptes à fins déterminées.

†Les données de l'exercice financier sont tirées des comptes publics du Canada, tandis que les données mensuelles sont tirées de l'État des opérations financières, qui est publié dans la Gazette du Canada, sans la sanction du Vérificateur général. Il est fort probable que les sommes des données mensuelles d'un même exercice diffèrent des chiffres annuels tirés des comptes publics.

Special features of a number of issues are as follows:

- (a) This item represents the cancellation of securities held by purchase funds.  
 (b) Callable after 15 September 1996.  
 (c) On 18 March 1975 the Government of Canada announced that the 3% perpetual bonds will be redeemed at par on 15 September 1996.  
 (d) Callable after 1 April 1988.  
 (e) Canadair debt assumed by the Government of Canada; the 12½% notes were originally issued on November 15, 1982 and the 8½% notes on April 26, 1982.  
 (f) This item represents the cancellation of securities held by Securities Investment Account.

Les renvois ci-dessous indiquent les particularités de certaines émissions :

- (a) Annulation de titres détenus par le fonds de rachat.  
 (b) Remboursables par anticipation après le 15 septembre 1996.  
 Le 18 mars 1975, le gouvernement du Canada a annoncé que les obligations perpétuelles à 3% seront remboursées à leur valeur nominale le 15 septembre 1996.  
 (d) Remboursables par anticipation, après le 1<sup>er</sup> avril 1988.  
 La dette Canadair assumée par le gouvernement du Canada; les notes de 12½% ont été émises le 15 novembre 1982 et les billets de 8½% le 26 avril 1982.  
 (f) Annulation de titres détenus par la Caisse de placements.

\*Users of these measures of capacity utilization are advised to refer to the discussion of them in the May 1980 issue of this Review "Measuring Capacity Utilization: A Technical Note". Particular attention should be paid to the discussion of how the data are to be evaluated and interpreted.

\*Les utilisateurs des données des taux d'utilisation des capacités sont invités à se référer à l'étude qui a été publiée sur ce sujet dans la Revue de mai 1980 sous le titre : «Les méthodes d'estimation des taux d'utilisation des capacités». Il convient d'accorder une attention particulière à l'analyse de la façon dont il faut évaluer et interpréter ces données.

\*Starting in January 1987, data taken from the Survey of Employment, Payroll and Hours are not strictly comparable with those for earlier months because of improvements in sampling methodology. Adjustment factors to calculate growth rates across this statistical break are available from Statistics Canada.

\*Les données extraites de l'Enquête sur l'emploi, la rémunération et les heures de travail ne sont plus, depuis janvier 1987, tout à fait comparables à celles des mois précédents, en raison d'améliorations apportées à la méthode d'échantillonnage. Il est possible de se procurer, auprès de Statistique Canada, les facteurs de correction permettant d'obtenir des taux de croissance comparables pour les séries antérieures et postérieures à janvier 1987.

\*Starting in January 1987, data taken from the Survey of Employment, Payroll and Hours are not strictly comparable with those for earlier months because of improvements in sampling methodology. Adjustment factors to calculate growth rates across this statistical break are available from Statistics Canada.

\*Les données extraites de l'Enquête sur l'emploi, la rémunération et les heures de travail ne sont plus, depuis janvier 1987, tout à fait comparables à celles des mois précédents, en raison d'améliorations apportées à la méthode d'échantillonnage. Il est possible de se procurer, auprès de Statistique Canada, les facteurs de correction permettant d'obtenir des taux de croissance comparables pour les séries antérieures et postérieures à janvier 1987.

Seasonally adjusted, unless otherwise indicated Données désaisonnalisées, sauf indication contraire

| Year and month<br>Année ou mois | Manufacturers' inventories, shipments and orders, millions of dollars<br>(monthly rates or end of period)<br>Stocks, expéditions et carnets de commandes des fabricants, en millions de dollars (Chiffres mensuels ou de fin de période) |                                   |   |   |   |   | Industrial production<br>millions of 1986 dollars<br>Production industrielle en millions de dollars de 1986 | Average weekly hours, hourly rated employees, manufacturing (unadjusted)<br>Moyenne hebdomadaire des heures de travail des employés payés à l'heure — Industries manufacturières (données non désaisonnalisées) | Thousands of person-days lost through labour disputes (unadjusted)<br>Milliers de journées-personnes perdues par suite de conflits du travail (données non désaisonnalisées) | Farm cash income, millions of dollars (unadjusted)<br>Revenu en espèces des agriculteurs, en millions de dollars (données non désaisonnalisées) | Annual rates<br>Chiffres annuels  |   |  |  |   |

# Notes to the tables

## Cansim-Databank identification numbers

Many of the time series published in the Review are available from Statistics Canada in machine-readable form, for use on computers, or in print-outs. Each time series of annual, quarterly, monthly or weekly data on the Cansim system (Canadian Socio-Economic Information Management) has an identification number. A variety of prefixes identify the series maintained by Statistics Canada (e.g. D1432, P484000), while those maintained by the Bank of Canada have a B prefix (e.g. B318), and those maintained by Canada Mortgage and Housing Corporation have a H prefix (e.g. H48). The identification number is given as a reference at the top of each column of data and refers to the series of weekly, monthly or quarterly data in that column. Where the frequency of a series as it is available on Cansim is different from that shown in the table or where a combination of quarterly and monthly data is shown in the table, the frequency of the Cansim series is indicated by a superscript M if monthly or by a superscript Q if quarterly. Current and revised data are entered into Cansim immediately on release.

## Weekly series

The tables in the Review do not cover a full year of weekly data. For all Wednesday series, in the event a holiday falls on a Wednesday, data for the preceding business day will be shown. Figures for weekly series for which the Bank of Canada is the source are available on request to the Department of Monetary and Financial Analysis, Bank of Canada, Ottawa K1A 0G9.

## Notes to the tables

The reference notes to the statistical tables in the Review, which prior to 1981 were included in each monthly issue, are now printed under a separate cover. The separate section of notes will be updated and reprinted as necessary. Additional copies of the explanatory notes may be obtained by writing to the Bank of Canada Review, Public Information Division, Secretary's Department, Bank of Canada, Ottawa K1A 0G9. The latest note supplement is dated January 1989.

This section of the monthly Review will include only revisions to the notes as may be required to keep them current for users of the statistical tables, as well as the reference notes pertaining to tables that are published only occasionally in the Review.

# Notes relatives aux tableaux

## Cansim – Numéros de référence des séries de Databank

Nombre des séries chronologiques publiées dans la Revue peuvent être obtenues de Statistique Canada sous une forme directement exploitable par ordinateur ou sous la forme d'imprimés. Elles font partie intégrante du fichier Cansim<sup>1</sup>, dont chaque série chronologique – annuelle, trimestrielle, mensuelle ou hebdomadaire – est identifiée par un numéro de référence. Les numéros des séries élaborées par Statistique Canada sont précédés de diverses lettres (par exemple : D1432, P484000), ceux des séries de la Banque du Canada, de la lettre «B» (par exemple : B318) et ceux de la Société canadienne d'hypothèques et de logement, de la lettre «H» (par exemple : H48). Dans nos tableaux, le numéro apparaît en tête de la colonne et identifie la série hebdomadaire, mensuelle ou trimestrielle qui figure dans la colonne; lorsque les fréquences de données figurant au fichier Cansim et dans un tableau de la Revue diffèrent ou que le tableau comporte à la fois une série mensuelle et une série trimestrielle, la fréquence de la série Cansim est indiquée par la lettre «M» si la série est mensuelle et par la lettre «Q» si elle est trimestrielle.

<sup>1</sup> Ce sigle est une abréviation de *Canadian Socio-Economic Information Management System* - Système canadien de traitement des données socio-économiques.

## Séries hebdomadaires

Dans les tableaux de la Revue, les séries de données hebdomadaires ne couvrent pas une année entière. Lorsque le mercredi est un jour férié, les statistiques du mercredi sont établies à partir des données du jour ouvrable précédent. On pourra obtenir les données provenant de la Banque du Canada en s'adressant au département des Études monétaires et financières, Banque du Canada, Ottawa K1A 0G9.

## Notes relatives aux tableaux

Les notes relatives aux tableaux de la Revue, qui jusqu'à la fin de 1981 étaient reproduites dans chaque livraison, sont désormais imprimées séparément. Elles seront mises à jour et publiées au besoin. Ceux qui désirent recevoir d'autres exemplaires des notes sont priés de s'adresser à la Revue de la Banque du Canada, Section de l'information, Secrétariat, Banque du Canada, Ottawa K1A 0G9. Le plus récent supplément a été produit en janvier 1989.

La présente section de la Revue ne contiendra que les mises à jour essentielles à l'interprétation des statistiques et les notes se rapportent aux tableaux publiés à des fréquences variables dans la Revue.

## A1

As a result of a rebasing of the national accounts, lines 10-15 on page 3 of the Notes should now read:

- 10 Gross domestic product at constant (1986) prices (Table H3)
- 11 Gross domestic product by industry; at constant 1986 prices (Table H5)
- 12 Industrial production; at constant 1986 prices (Table H13)
- 13 Manufacturing production; at constant 1986 prices (Table H5)
- 14 Gross national expenditure implicit price index; 1986=100 (Table H4)
- 15 Consumer price index excluding food; 1986=100 (Table H11)

## D1-D2

Sources: Bank of Canada, Statistics Canada

Data on Table D1 are derived from total trust and mortgage loan company data collected quarterly by Statistics Canada (available in "Financial Institutions," Catalogue No. 61-006) and from a monthly survey by the Bank of Canada of companies that, at the end of September 1989, represented over 80 per cent of total assets in these industries. For months between quarter-ends, financial items on Table D1 are estimated individually from this survey to obtain aggregate data for the industry. As a result, for these months, total assets may not equal total liabilities, as they are the sums of the component series. Where there are foreign currency assets or liabilities these are included in the relevant component series. Data for the mortgage subsidiaries of the chartered banks appearing on Table D2 originate directly from the monthly survey by the Bank of Canada. On 25 January 1988 the Laurentian Group, which included Eaton-Bay Financial Services, restructured its assets and liabilities among three companies: Laurentian Bank, Laurentian Trust and Laurentian Bank of Canada Mortgage Corporation. As a result, total assets and liabilities of trust and mortgage loan companies were reduced by \$207 million, representing the amount of assets and liabilities allocated to the Laurentian Bank from Eaton-Bay Trust.

- *Cash and gross demand and notice deposits* include deposits placed in chartered banks and other financial institutions in Canada and abroad.
- *Items in transit* represent the net balance of all items in the course of settlement.
- *Term deposits* include swapped deposits at chartered banks and deposits at institutions other than chartered banks.
- *Other short-term paper and bankers' acceptances* include notes issued by sales finance companies and provincial and municipal treasury bills and short-term notes.
- *Canadian bonds* are bonds, debentures and notes with an original term to maturity of one year or more.
- *Personal loans* comprise both secured and unsecured loans. Beginning in December 1989, this series also includes loans to unincorporated businesses and non-profit organizations.
- *Other loans* include secured loans placed with investment dealers as well as other collateral and unsecured loans; they also include farm loans.

- *Other assets* comprise other investments in Canada as well as investments in institutions and corporations outside Canada, investments in and claims on parent, subsidiary and affiliated companies, accounts receivable and accrued revenue, fixed assets, real estate and other assets, less accumulated provisions for losses on loans and investments.

- *Daily interest deposits* include only those deposits held by companies surveyed by the Bank of Canada.
- *Personal deposits* include deposits by individuals, unincorporated businesses and non-profit institutions.
- *Tax-exempt deposits* include RRSPs, RHOSPs and other tax-sheltered funds placed in savings and term deposits.
- *Promissory notes and debentures* include promissory notes, subordinated notes and debentures issued under trust indenture.
- *Other liabilities* consist of debt owing to parent, subsidiary and affiliated companies, accounts payable and accrued liabilities, corporation income taxes payable, deferred income, mortgages payable, deferred income taxes and other liabilities.

## A1

L'année de base retenue dans les comptes nationaux ayant été modifiée, les lignes 10-15 de la page 3 des Notes aux tableaux devraient maintenant se lire comme suit :

- 10 Produit intérieur brut à prix constant (1986) (Tableau H3)
- 11 Produit intérieur brut par branche d'activité à prix constants (1986) (Tableau H5)
- 12 Production industrielle à prix constants (1986) (Tableau H13)
- 13 Production manufacturière à prix constants (1986) (Tableau H5)
- 14 Dépense nationale brute; indice synthétique des prix; 1986=100 (Tableau H4)
- 15 Prix à la consommation, alimentation exclue; 1986=100 (Tableau H11)

## D1 et D2

Source : Banque du Canada et Statistique Canada

Les données qui figurent au Tableau D1 sont tirées de l'ensemble des données des sociétés de fiducie ou de prêt hypothécaire, recueillies tous les trimestres par Statistique Canada (publiées dans *Institutions financières*, catalogue n° 61-006) et d'une enquête mensuelle menée par la Banque du Canada auprès d'un échantillon de sociétés de fiducie ou de prêt hypothécaire qui, à la fin de septembre 1989, détenaient plus de 80 % de l'actif de ce secteur. Pour ce qui est des mois qui ne coïncident pas avec une fin de trimestre, les chiffres des postes financiers figurant au Tableau D1 sont estimés au cas par cas à partir des données de l'enquête mensuelle pour obtenir les données globales du secteur. En conséquence, le total des actifs pour les mois en question peut ne pas être égal au total des éléments du passif correspondant, puisqu'il résulte de l'addition des chiffres de chacun des éléments de la série visée. Les avoirs et engagements en monnaies étrangères sont inclus le cas échéant dans chacune des séries correspondantes. Les données des filiales hypothécaires des banques à charte, qui figurent au Tableau D2, sont tirées directement de l'enquête mensuelle de la Banque du Canada. Le 25 janvier 1988, le groupe financier de la Laurentienne, qui comprenait les Services financiers Eaton-Baie, a réparti ses avoirs et engagements entre trois sociétés : la Banque Laurentienne du Canada, le Trust La Laurentienne du Canada Inc. et la Société d'hypothèque Banque Laurentienne du Canada. Par conséquent, les avoirs et les engagements totaux des sociétés de fiducie ou de prêt hypothécaire ont accusé une baisse de 207 millions de dollars, montant qui représenterait la part des avoirs et engagements du Trust Eaton-Baie allouée à la Banque Laurentienne du Canada.

- *L'encaisse, les montants bruts des dépôts à vue et les dépôts à préavis* comprennent les dépôts confiés aux banques à charte et aux autres institutions financières au Canada et à l'étranger.
- *Les effets en cours de compensation* représentent le solde net de tous les effets en cours de règlement.
- *Les dépôts à terme* comprennent les dépôts swaps dans les banques à charte et les dépôts dans les institutions autres que les banques à charte.
- *Le poste autre papier à court terme et acceptations bancaires* comprend les billets émis par les sociétés de financement, les bons du Trésor émis par les provinces ou les municipalités et les billets à court terme.
- *Obligations canadiennes*. Ce poste comprend les obligations, les débetures et les billets dont l'échéance est de un an ou plus.
- *Les prêts aux particuliers* comprennent les prêts garantis ou non garantis. Depuis décembre 1989, cette série comprend également les prêts aux entreprises non constituées en sociétés et aux sociétés à but non lucratif.
- *Les autres prêts* comprennent les prêts garantis accordés aux courtiers en valeurs mobilières de même que les autres prêts sur nantissement et les prêts non garantis; ils comprennent également les prêts agricoles.
- *Les autres éléments de l'actif* comprennent les autres placements au Canada et les placements dans les institutions et les sociétés constituées à l'étranger, les placements dans les sociétés mères ou les créances sur celles-ci, les filiales et les sociétés affiliées, les comptes-clients, les produits constatés par régularisation, les immobilisations, les biens immobiliers et autres avoirs, moins le montant cumulé des provisions pour pertes sur prêts et sur placements.

- *Le poste dépôts à intérêt quotidien* ne comprend que les dépôts détenus par les sociétés comprises dans l'enquête de la Banque du Canada.
- *Les dépôts des particuliers* comprennent les dépôts des particuliers, ceux des entreprises non constituées en sociétés et ceux des sociétés à but non lucratif.
- *Les dépôts exempts d'impôts* comprennent les REER, les REEL et autres fonds non imposables placés sous forme de dépôts d'épargne et de dépôts à terme.
- *La rubrique billets à ordre et débetures* comprend les billets à ordre, les billets subordonnés et les débetures émises en vertu d'un acte fiduciaire.
- *Les autres éléments du passif* se composent des sommes dues aux sociétés mères, aux filiales et aux sociétés affiliées, les comptes-fournisseurs et les charges à payer, les impôts à payer sur le revenu des sociétés, les revenus différés, les emprunts hypothécaires, les impôts sur le revenu différés et les autres engagements.

## H5

Source: Statistics Canada

Data are obtained from the Statistics Canada monthly publication "Gross Domestic Product by Industry," Catalogue 15-001 and are generally compiled according to the 1980 Standard Industrial Classification. The industry groups—mines, quarries and oil wells, manufacturing, and other utilities—are the component parts of industrial production.

• The *business sector* includes all enterprises that operate for gain. • The *non-business sector* consists primarily of government services, educational services and hospitals and related health and social services.

## H11

Source: Statistics Canada

Data are obtained from the Statistics Canada publication "The Consumer Price Index," Catalogue 62-001. Beginning in January 1989 the weights used in constructing the index are based on 1986 consumer expenditure patterns, replacing the 1982 weights used from January 1985. Three earlier reweightings occurred, in April 1982 incorporating 1978 expenditure patterns, in October 1978 using 1974 weights and in May 1973 using 1967 weights. In July 1990, with the release of the June 1990 consumer price index, the time base was changed in a purely arithmetic operation from 1981 to 1986=100. Further information on these revisions, as well as on the concepts and methodology, may be obtained from Statistics Canada publications. Effective with the release of the January 1985 numbers Statistics Canada revised the definition of the shelter component to include both goods and services. A consistent historical series was provided back to September 1978.

The percentage changes shown in Column 15 of Table A1 are the rates published by Statistics Canada in Catalogue 62-001.

## H12

Sources: Statistics Canada, Labour Canada

• *Labour income, wages and salaries and profits per unit of output* have been calculated by the Bank of Canada from Statistics Canada data. Labour income per unit of output is obtained by dividing total labour income including military pay and allowances by GDP (in constant 1986 dollars). Non-farm commercial wages and salaries per unit of output are obtained by dividing total wages and salaries less wages and salaries in agriculture, fishing, trapping, public administration and non-commercial services by GDP for the commercial non-farm sector. Manufacturing wages and salaries per unit of output are obtained by dividing manufacturing wages and salaries by gross manufacturing output. Non-farm commercial profits per unit of output are obtained by dividing corporate profits incorporated as a component of GDP by GDP for the commercial non-farm sectors. Except for the last calculation, GDP for the non-farm and commercial non-farm sectors excludes fishing and trapping.

## H13

Sources: Statistics Canada, Labour Canada

• *Retail trade* figures refer to aggregate sales by retail outlets; direct sales to consumers that bypass the retail outlet are not included. In the table, sales of recreational and motor vehicle dealers have been subtracted from total retail sales.

## H5

Source : Statistique Canada

Ces données sont tirées de la publication mensuelle de Statistique Canada intitulée «Produit intérieur brut par industrie», n° de catalogue 15-001; elles sont généralement établies d'après la Classification type des industries de 1980. La production industrielle englobe les secteurs suivants : mines, carrières et puits de pétrole, fabrication et services d'utilité publique.

• Le *secteur des entreprises* comprend toutes les entreprises à but lucratif. • Le *secteur non commercial* comprend principalement les services publics, les établissements d'enseignement, les hôpitaux ainsi que les services de santé et les services sociaux connexes.

## H11

Source : Statistique Canada

Les données proviennent de la publication de Statistique Canada intitulée «L'indice des prix à la consommation» (n° 62-001 au catalogue). À compter de janvier 1989, les pondérations qui servent au calcul de l'indice sont fondées sur la structure des dépenses de 1986 et remplacent les pondérations de 1982, qui étaient utilisées depuis janvier 1982. Les pondérations avaient été révisées à trois reprises auparavant, soit en avril 1982 pour tenir compte de la structure des dépenses de 1978, en octobre 1978 pour tenir compte de la structure des dépenses de 1974 et en mai 1973 pour tenir compte de la structure des dépenses de 1967. En juillet 1990, après publication des données de l'indice des prix à la consommation pour juin 1990, l'ancienne année de base, soit 1981, a été remplacée par 1986; les opérations effectuées ont été purement arithmétiques. On trouvera dans les publications de Statistique Canada de plus amples renseignements sur ces révisions ainsi que sur les concepts et la méthodologie utilisés. La publication des données de janvier 1985 a coïncidé avec la révision par Statistique Canada de la définition du logement; la nouvelle définition de cette composante englobe à la fois des biens et des services. La série chronologique utilisant cette définition remonte à septembre 1978.

Les taux de variation reproduits à la colonne 15 du Tableau A1 sont extraits de la publication n° 62-001 de Statistique Canada.

## H12

Sources : Statistique Canada, Travail Canada

• Le *revenu du travail* et les *bénéfices par unité produite* ont été calculés par la Banque du Canada à partir des données de Statistique Canada. Pour calculer les gains des ouvriers par unité produite, on a divisé l'ensemble des gains des employés (solde et allocations des militaires comprises) par le PIB en dollars de 1986. Les salaires et traitements par unité produite dans les entreprises non agricoles sont calculés en divisant l'ensemble des salaires et traitements moins les salaires et traitements versés aux employés dans l'agriculture, la pêche, le piégeage, l'administration publique et les services non commerciaux par la production brute du secteur. Les salaires et traitements par unité produite des ouvriers dans les industries manufacturières sont calculés en divisant les salaires et les traitements payés dans ces industries par la production brute de celles-ci. Les bénéfices par unité produite des entreprises commerciales, agriculture exclue, sont calculés en divisant le montant global des bénéfices de ces entreprises, qui figure dans le PIB, par leur production brute. Exception faite du dernier calcul, la production brute du secteur non agricole et des entreprises commerciales non agricoles exclut la pêche et le piégeage.

## H13

Sources : Statistique Canada, Travail Canada

• Le *commerce de détail* comprend l'ensemble des ventes des détaillants; les ventes faites directement aux consommateurs sans l'entremise des détaillants sont exclues. Ont été soustraites de l'ensemble des ventes, les ventes de véhicules de tourisme et de véhicules automobiles effectuées par les concessionnaires.

## K6

Source: Statistics Canada

Data are obtained from the Statistics Canada publication "Trusteed Pension Plans—Financial Statistics 1985" and similar surveys in previous years. These publications contain more detailed information than is shown in the table. A trustee pension fund is defined as an arrangement under which contributions to a pension plan are deposited with a trustee who is responsible for holding and investing funds and paying benefits in accordance with the terms of a trust agreement. In the case of pooled and mutual funds, ownership is shared by several organizations to enable small plans to diversify their investments. Prior to 1965 guaranteed investment certificates were included with cash and bank deposits and short-term investments were included in other assets. Beginning with 1973, the total assets of trustee pension plans shown in this table differ from the figures published by Statistics Canada in that they do not include investment by life insurance companies in segregated or pooled funds. These assets are included in data for the life insurance industry.

• *Government bonds* include guaranteed bonds. • In 1989 *other assets* were made up of \$2,889 million accrued interest, \$1,144 million accounts receivable and \$5 million all other assets. • *Other plans* include religious, charitable and health organizations, trade and employee associations and co-operatives.

## K6

Source : Statistique Canada

Ces données sont extraites de la publication de Statistique Canada intitulée « Régime de pensions en fiducie—Statistique financière 1985 » et des publications équivalentes des années précédentes. Ces publications contiennent des renseignements plus détaillés que le Tableau A8. On désigne sous le nom de caisse de retraite gérée en fiducie tout plan de retraite en vertu duquel les cotisations et contributions sont confiées à des fiduciaires qui se sont engagés à conserver et à investir ces fonds et à verser les prestations conformément aux dispositions d'un acte de fiducie. Dans le cas de placements dans des fonds en commun et dans des fonds mutuels, on les répartit généralement entre plusieurs organismes, ce qui permet d'assurer une plus grande diversité aux caisses de petites entreprises. Antérieurement à 1965, l'encaisse et les dépôts en banque comprenaient les certificats de placement garantis tandis que les placements à court terme figuraient avec les *autres éléments de l'actif*. À partir de 1973, les données relatives aux avoirs des caisses de retraite gérées en fiducie diffèrent de celles de Statistique Canada, du fait qu'elles ne comprennent pas les placements inscrits par les compagnies d'assurance-vie dans des comptes séparés ou communs. Ces avoirs sont englobés dans les données relatives aux compagnies d'assurance-vie.

• *Les obligations des gouvernements* comprennent les obligations garanties par eux. • En 1989, les *autres éléments de l'actif* se répartissaient comme suit : intérêts courus, \$2 889 millions; comptes à recevoir, \$1 144 millions; autres actifs, \$5 millions. • Les *autres caisses* comprennent les caisses des organismes religieux, de bienfaisance et de soins de santé, et celles des associations professionnelles, des associations d'employés et des coopératives.

Rapports techniques (voir la liste aux pages suivantes)

Working Papers

Documents de travail

*Technical Reports are published in the original language only, with an abstract in both official languages. Single copies of these publications may be obtained without charge by writing to: Public Information Division, Secretary's Department, Bank of Canada, Ottawa K1A 0G9. Consult the December 1982 issue of the Review for a list of the Staff Research Studies and Technical Reports published before 1980.*

#### Technical Reports

- 18 Simulation analysis of a model based on the life-cycle hypothesis (1980)  
Jean-Pierre Aubry and Diane Fleurent
- 19 The process of wage determination: A survey of some recent work (1979)  
Daryl L. Merrett
- 20 Some aspects of the Canadian experience with flexible exchange rates in the 1970s (1980)  
Charles Freedman and David Longworth
- 21 Two Canadian investment outlook surveys: An overview and a review (1980)  
Brian O'Reilly
- 22 Building a small macro-model for simulation: Some issues (1980)  
Paul R. Masson, David E. Rose and Jack G. Selody
- 23 The productivity-inflation nexus in Canada 1963-1979 (1981)  
J. Peter Jarrett and Jack G. Selody
- 24 Economic projections and econometric modelling: Recent developments at the Bank of Canada (1981)  
Heather Robertson and Michael McDougall
- 25 The equations of RDXF, September 1980 version (1982)  
Heather Robertson and Michael McDougall
- 26 The structure and dynamics of RDXF, September 1980 version (1982)  
Heather Robertson and Michael McDougall
- 27 Monetary aggregates as targets: Some theoretical aspects (1981)  
Charles Freedman
- 28 A comparison of alternative methods of monetary aggregation: Some preliminary evidence (1981)  
Jon P. Cockerline and John D. Murray
- 29 Investment: A survey of models with some implications for the effects of monetary policy (1981)  
Francis Scotland
- 30 The leading indicator properties of surveyed consumer attitudes and buying intentions (1982)  
Bruce Rayfuse
- 31 The economic significance of aspects of Canada's international payments (1982)  
Kevin Clinton and David Longworth
- 32 The saving-investment approach to the current account (1982)  
John T. Cuddington
- 33 An econometric model of the steel trade (1982)  
Richard Dion
- 34 Modelling government fiscal behaviour in Canada (1983)  
Jack G. Selody and Kevin G. Lynch
- 35 Asset stocks and the use of monetary and fiscal policies to reduce inflation (1983)  
Paul Masson

*Les rapports techniques sont publiés seulement dans la langue utilisée par les auteurs; ils sont cependant précédés d'un résumé bilingue. On peut obtenir gratuitement un exemplaire de ces publications en s'adressant à la Section de l'information, Secrétariat, Banque du Canada, Ottawa K1A 0G9. Pour obtenir la liste des travaux de recherche et des rapports techniques publiés avant 1980, veuillez consulter le numéro de décembre 1982 de la Revue.*
